

REPORTING FUNCTION OF THE SAR INITIATIVE

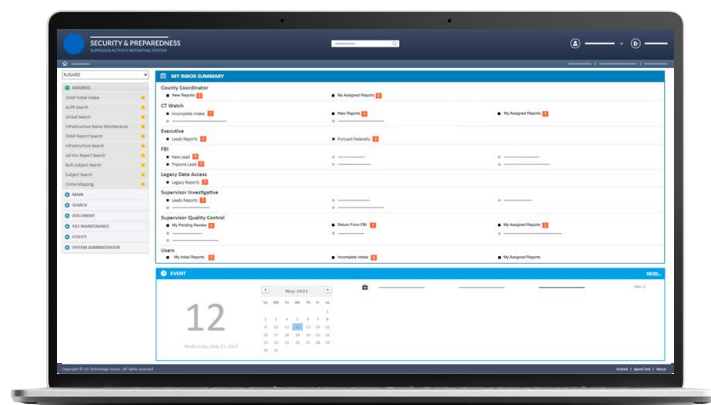

I FEATURES

SUSPICIOUS ACTIVITY REPORTING

The National SAR Initiative (NSI) is a collaborative effort led by the U.S. Dept of Justice (DOJ), Bureau of Justice Assistance, in partnership with the U.S. Dept of Homeland Security, the FBI, and state, local, tribal, and territorial law enforcement partners.

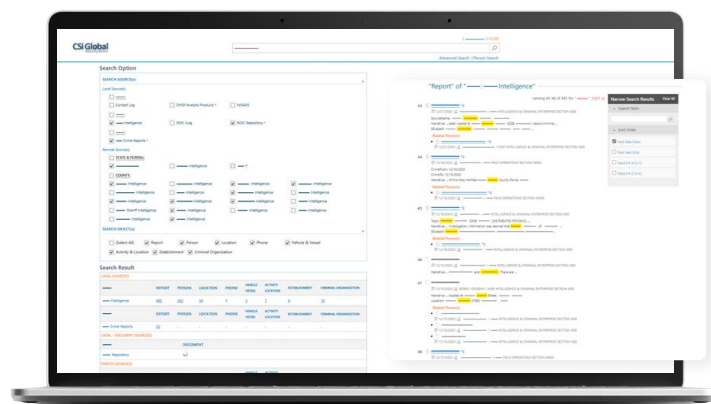

- Suspicious persons of interest, locations, and vehicles investigation
- Critical infrastructure and soft targets incident tracking
- Targeted population incident monitoring
- Identification, tracking, and search of extremist ideologies
- Robust ad hoc search and Actionable Report generation

GLOBAL SEARCH

Search state, county, local agencies, and participating InfoShare™ systems with Global Search. Confidential information in search results is shared based on permission level, and they can be further searched to return specific results.

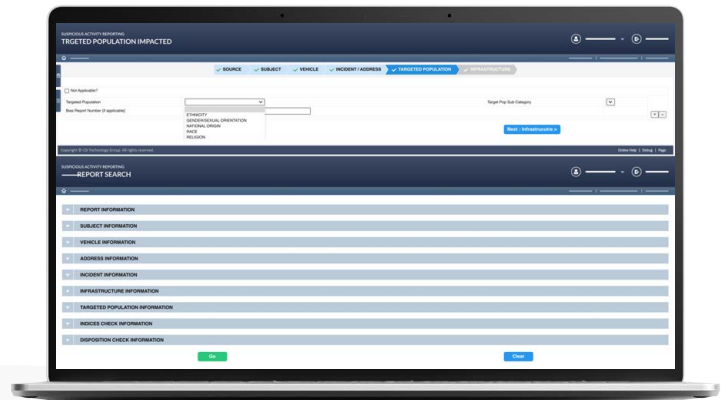

- Advanced filtering and Boolean search
- Inter-agency database search (participating agencies)
- Permission-based search results
- Document repository full-text and keyword search
- Interfaces with federal, state, and county law enforcement partners

TARGETED POPULATIONS

Track a targeted population based on the threat to an individual's ethnicity, national origin, gender/sexual orientation, race, or religion. The SAR platform can be configured to produce customized Target Population reports based on agency needs.

- Individual targeted population impacted tab
- Targeted population linkage to specific types of incidents
- Domestic and international extremist group data gathering
- Threat type and infrastructure trend identification
- Configurable support files and business rules
