

AUTOMATED LICENSE PLATE READER

REAL-TIME CRIME AND HISTORICAL INVESTIGATIONS

ALPR data is a force multiplier and valuable tool to solve crimes and deter criminal activity

Every day more and more ALPR cameras are coming online, storing thousands of plates in ALPR databases. Efficient ALPR searches allow agencies to pinpoint the exact location of where a vehicle may have been or wasn't, which can either corroborate or refute an individual's statement as to their whereabouts. CSI's ALPR is designed for regional interagency data sharing and currently used in Law Enforcement fusion and real-time crime centers, as well as in state, county, and local agencies.

ALPR WAREHOUSE

CSI can create an agency-specific ALPR Warehouse, which receives and stores ALPR reads from other agencies, allowing all associated agencies to search across databases.

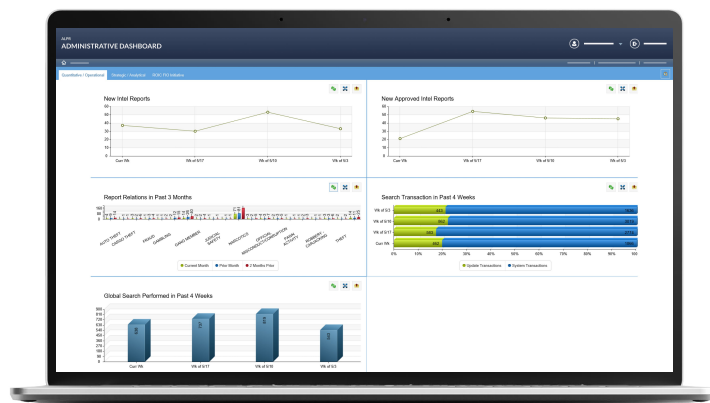

- Agency ALPR database
- Agency-managed data sharing and access
- Regional ALPR collection and sharing network

ALPR ADMINISTRATIVE DASHBOARD

The main page of the ALPR Administrative Dashboard provides a visual, color-coded description of the current operational status of all agency ALPRs that are feeding the ALPR Warehouse. Any participating agency's camera can be analyzed to identify possible bad reads.

- Visual identification of overall operational status
- Email notifications for incidents needing review and attention
- Camera health check across various time periods
- Service alerts for issues and duration of incidents
- Daily report of all cameras with configurable alerts in Excel format

PREMIER SOFTWARE SOLUTIONS FOR EGOVERNMENT

CSI designs robust, fully integrated, and configurable software to revolutionize state, county, and local government operations.
