

GLOBAL SEARCH BROKER

POWER-PACKED SEARCH ENGINE WITH ADVANCED FEATURES

Quickly search all of your connected databases and return specific results to aid your investigation

Global Search has been developed to search all connected sources, by up to eight objects. Users can opt for a standard keyword search or switch to advanced search or person search. Search results are grouped into multiple categories split by local/remote, source, database, and object to allow for a comprehensive overview of the results. Furthermore, results themselves can be searched so that users can find the desired information as quickly as possible.

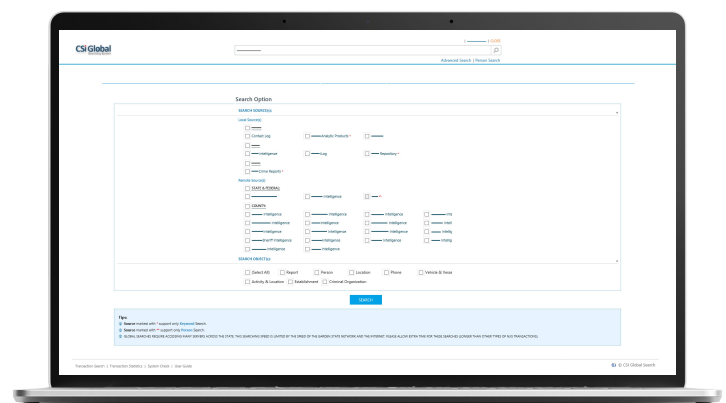

FEATURES

SEARCH FEATURES

Connect to an unlimited number of sources including local, county, state, federal, Homeland Security, and participating agencies. Users can search as many or as few databases, with simple keywords or advanced search options.

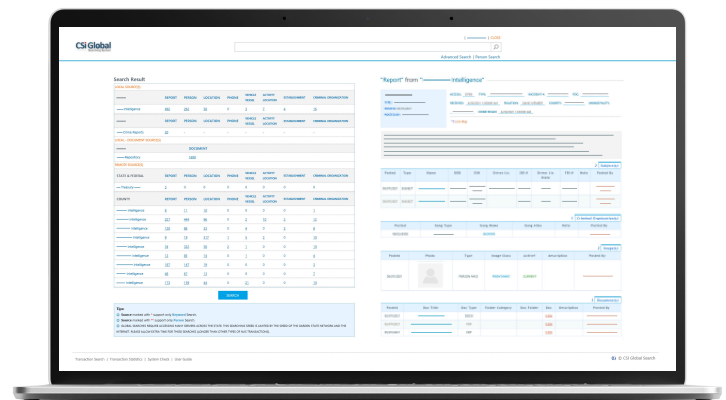

- Local and remote sources
- Advanced filtering and Boolean search
- Inter-agency search (participating agencies)
- Multiple data types/object search
- Wildcard search

SEARCH RESULTS

Search results are grouped by local/remote, source, database, and object. The number of results for each object is clearly identified, allowing users to focus on the information to move their investigations forward.

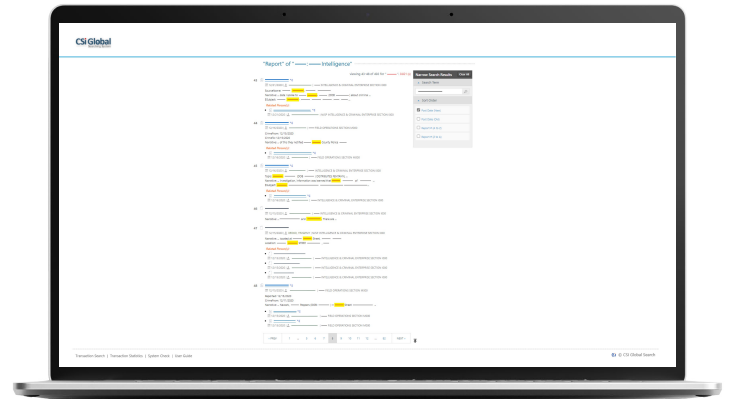

- Agency-specific search results
- Object-specific search results
- Cross-object search results
- Permission-based search results

NARROW SEARCH RESULTS

Drill-down filtering allows users to refine search results at a more granular level. Users can use specific keywords to narrow down search results in order to find the desired information.

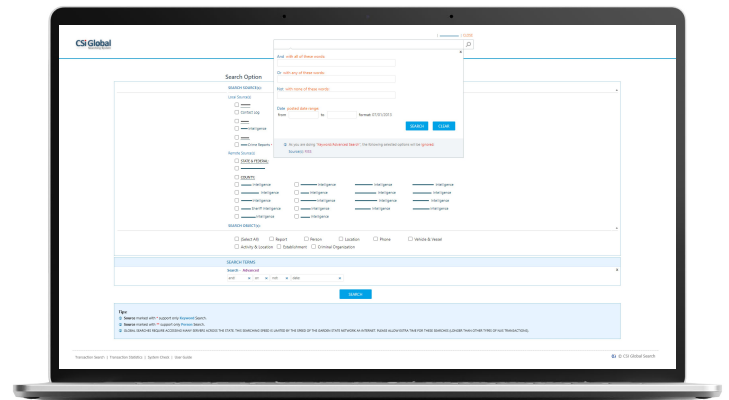

- Drill-down filtering with keywords
- Full-text and keyword search
- Report preview and author details on hover

ADVANCED SEARCH

Access advanced search functions to narrow the search scope with Boolean operators (AND, OR, and NOT), date ranges, and structured person search incorporating unique identifiers.

- Boolean search
- Date range search
- Structured person search

PREMIER SOFTWARE SOLUTIONS FOR EGOVERNMENT

CSI designs robust, fully integrated, and configurable software to revolutionize state, county, and local government operations.
