

INTELLIGENCE

MANAGE INTELLIGENCE DATA IN A 28 CFR PART 23 DATABASE

Intelligence data management, reporting, and analytics for intelligence-led policing

A criminal intelligence system developed to easily create, manage, and use permission-based settings to share data for investigation support and crime activity analysis. Other features include crime mapping, link analysis, robust search capabilities, streamlined reporting, and configurable interactive dashboard to provide a quantitative and strategic overview of intelligence data.

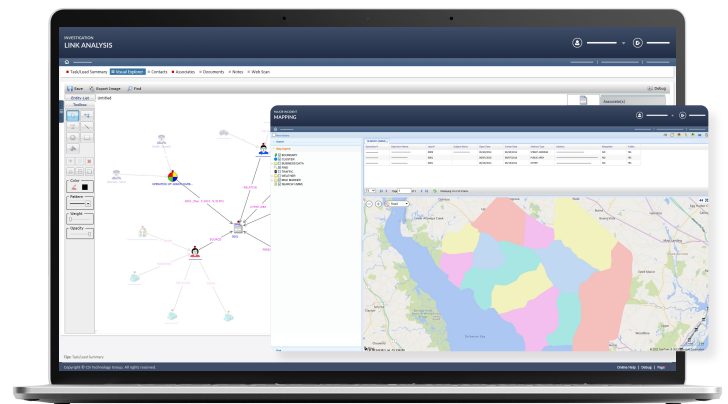

FEATURES

CRIMINAL INTELLIGENCE SYSTEM

Efficiently manage intelligence data and generate reports in a 28 CFR Part 23 compliant application. Maintain all documents, notes, images, sources, and permissions in separate tabs. The dissemination sensitivity and security setting of each report ensures only authorized individuals have access.

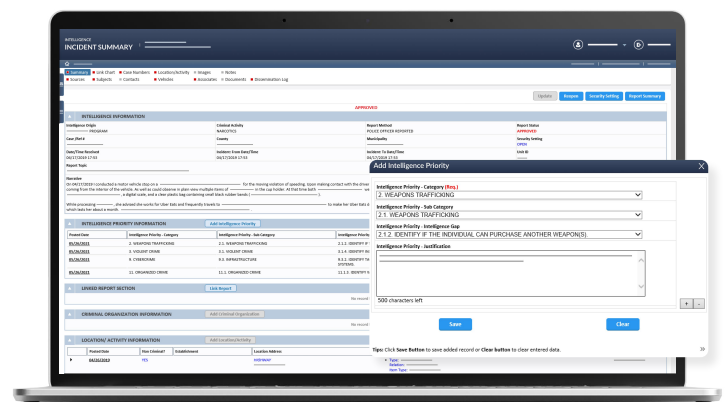

- Streamlined intelligence reporting and approval
- Source and information reliability documentation
- Link chart for overview of collected intelligence
- Intelligence-led policing with link analysis and crime mapping
- Data sharing with robust security and permission settings
- Dissemination logs to maintain audit trails

INTELLIGENCE PRIORITIES

Identify information gaps that will provide tactical and strategic information related to criminal activity, disrupt criminal networks, and protect the homeland.

- Configurable support files
- Intelligence gaps documentation
- Intelligence dissemination for collaboration and information exchange
- Criminal activity trend identification and analysis
- Linked reports

CONFIGURABLE DASHBOARD

Display intelligence reports, analytics, and provide interactive graphs of new reports. Administratively, view which members are creating reports and identify approved reports by week. Fully customizable to present data that is important to each agency.

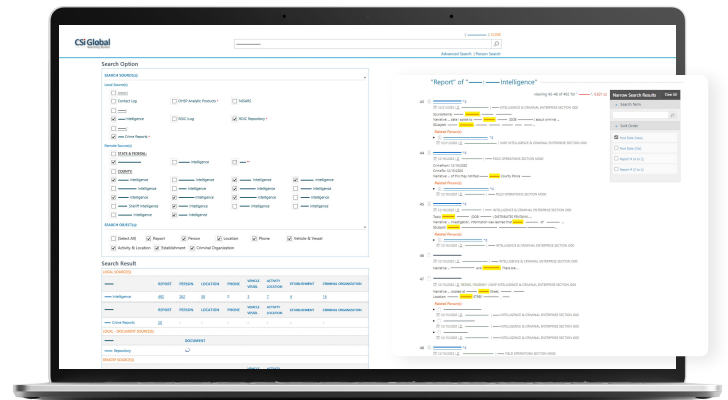

- Agency-specific reports and analytics
- Multiple datasets and graphs displayed in one window
- Interactive graph of new reports
- Expandable segments
- Multi-tab data grouping

GLOBAL SEARCH

Search state, county, local agencies, and participating InfoShare™ systems with Global Search. Confidential information in search results is shared based on permission level, and they can be further searched to return specific results.

- Advanced filtering and Boolean search
- Inter-agency database search (participating agencies)
- Permission-based search results
- Document repository full-text and keyword search
- Interfaces with federal, state, and county law enforcement partners

ALPR SEARCH

More and more agencies are seeing the value in leveraging ALPR technology to solve crimes, identify suspects, recover stolen vehicles, and create hot lists to assist in investigations. A clean interface allows users to quickly search the CSI ALPR Warehouse and return results.

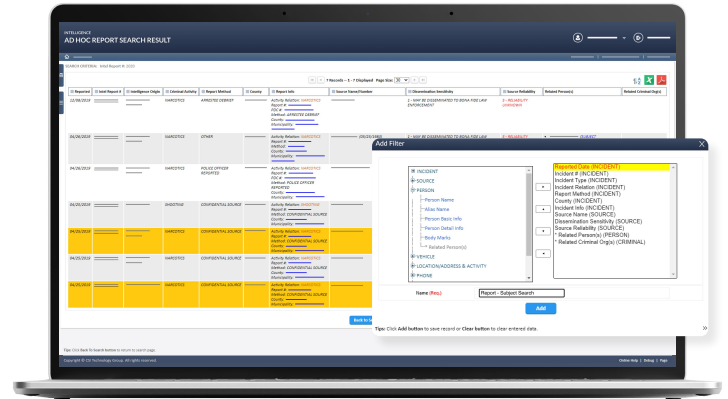

- Investigative lead generation
- Hot lists for real-time vehicle identification and tracking
- Interagency ALPR database search (participating agencies)

ROBUST SEARCH CAPABILITY

Ad hoc search fields include cyber, criminal organization, person, person details, vehicle, location, phone, activity type, source, and agency to name a few. Search the Master Name Index against connected databases, and person search by criminal activity type.

- Customized canned reports
- Multiple field search
- Output formats (Excel, PDF)

PREMIER SOFTWARE SOLUTIONS FOR EGOVERNMENT

CSI designs robust, fully integrated, and configurable software to revolutionize state, county, and local government operations.
