

TRANSCRIPTION WITH MINIMAL EFFORT AND COMPLETE INTEGRATION

Leverage the latest in AI technology to transcribe audio and video with minimal effort, reducing the amount of work in transcribing statements by at least 50%. Execute transcription processes directly from eDiscovery packages. Finished transcripts are reviewable, searchable, and linked to their corresponding case files.

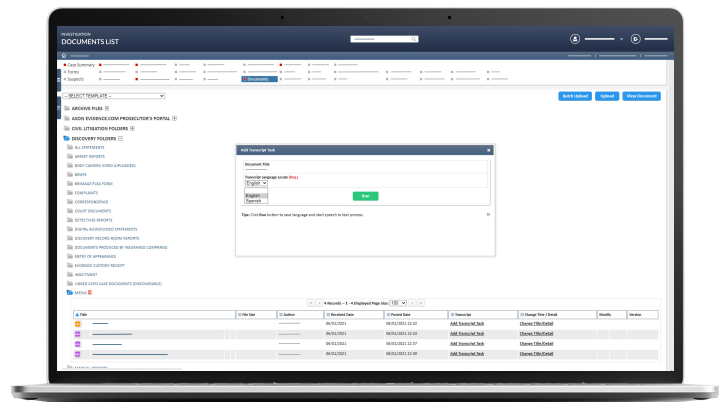

FEATURES

RAPID FIRST DRAFT

Produce a rough transcript in minutes using cloud-based speech translation powered by machine learning. First drafts are up to 80% accurate. Government cloud infrastructure offers enterprise-grade security and CJIS compliance.

- Accurate, high-quality rough drafts
- Searchable and reviewable transcripts
- Azure Artificial Intelligence and Government Cloud
- Voice recognition with probability index
- Support for multiple languages

TRANSCRIBER EFFICIENCY AND EDITING

Designed with quality-focused editing tools and functions. Each line is timestamped with a confidence level, and lines below a certain confidence level are automatically highlighted for review. Integrated keyboard and foot pedal controls maximize transcriber efficiency.

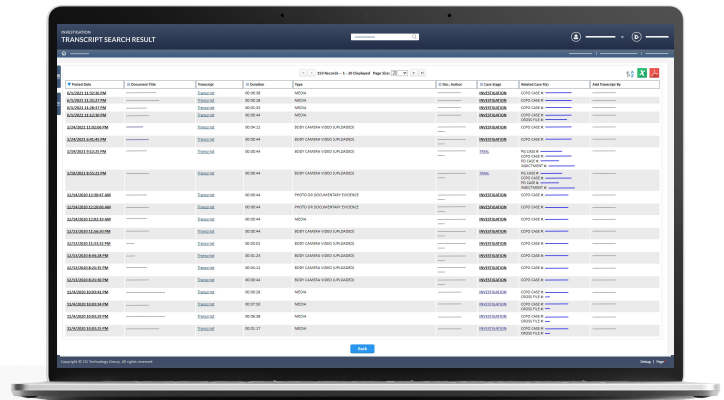

- Real-time playback
- Time stamps with confidence levels
- Color-coded speaker identifier
- Integrated transcriber keyboard and foot pedal controls
- Search, jump, rollback, flag, last review, and spell-check functions

SEAMLESS INTEGRATION

Users can execute transcription tasks, review, correct, and view transcripts directly from eDiscovery folders within a case file. Finished transcripts are searchable and automatically linked to audio, video, or interview recordings uploaded to the system in a compatible format.

- Launch, review, and correct directly from case files
- Unlimited corrections and reviews
- MP3/MP4 format conversion
- Multiple output formats (Word, PDF)
